Belo Horizonte, Brazil

## **Objective**

AWS Certified Cloud Engineer with software engineering background seeking to leverage expertise in infrastructure automation, CI/CD, and scalable architectures to drive innovation and operational excellence in dynamic technology organizations.

#### **Education and Certifications**

• Bachelor of Software Engineering - PUC Minas

2022 - 2026

• AWS Certified Solutions Architect Associate (SAA-C03) - Amazon Web Services

2025

• Full Stack Development Bootcamp

2022

#### **Technical Skills**

Cloud Computing

• Amazon Web Services

Cloud Security

Python

Linux

CI/CD

• Infraestructure as code (Terraform)

Docker

• JavaScript / TypeScript

• React.js, Next.js

· Node.js: Express

• Java: Spring / Hibernate

• HTML / CSS / Tailwind / Bootstrap

Databases

• OOP / SOLID / Design Patterns

• Test Driven Development (TDD)

• DDD / Clean Architecture

Microservices

## **Soft Skills**

• Problem-Solving

Analytical Thinking

• Team Collaboration

Adaptability

· Continuous Learning

Quality Focus

# **Professional Experience**

# **Software Engineer - ENX Services**

05/24 - 07/25

- Developed and maintained scalable web applications using modern technologies including TypeScript, JavaScript, React.js, Next.js, Tailwind CSS, Java, and PHP.
- Collaborated with cross-functional teams to analyze customer requirements and deliver technical solutions that improved system efficiency and user experience.
- Participated in code reviews, technical documentation, and knowledge sharing sessions, maintaining high coding standards and facilitating team development.
- Implemented responsive front-end interfaces and robust back-end services, ensuring optimal performance across multiple platforms and devices.

## **Personal Projects**

**Infra as code:** Complete AWS infrastructure automation using Terraform with high availability architecture, including VPC, Application Load Balancers, RDS Multi-AZ, Auto Scaling Groups, and comprehensive security configurations.

- Terraform, AWS VPC, ALB, Auto Scaling, RDS
- Modular Architecture
- github.com/samuelincoln1/infra-as-code

**Serverless Log Analyzer:** Real-time AWS log analysis system using Lambda, CloudTrail, and EventBridge, providing automated insights into AWS account activities, security events, and resource utilization patterns.

- Terraform, Python, AWS Lambda, CloudTrail, S3, EventBridge
- github.com/samuelincoln1/serverless-log-analyser

**CodeFlow:** CI/CD Pipeline that enables zero-downtime deployment automation using GitHub Actions, AWS S3, and CloudFront, integrated with the Portfolio Website project for continuous delivery.

- GitHub Actions, AWS S3, CloudFront
- samuellincoln.com/projects/codeflow

**Portfolio Website:** Modern responsive portfolio deployed on AWS with CloudFront CDN, showcasing cloud engineering projects and technical expertise through interactive documentation and demonstrations.

- Next.js, React, TailwindCSS, AWS S3, CloudFront, Github Actions
- github.com/samuelincoln1/portfolio
- samuellincoln.com
